WORKSHEET C

Making mixtures: Liquids

Your teacher will provide you with materials to make different mixtures. Follow the instructions below and answer the questions that follow.

1. Mix the following ingredients together in the container provided:
   - half cup of water
   - 5 tablespoons of cooking oil

Let the mixture stand for a few minutes before answering the questions.

2. Did the two liquids mix?

3. Why do you think the oil and water did not mix?

4. How would you separate these liquids?

5. Draw and label a picture of the mixture of oil and water in your exercise book.
